

SENSITIVE ZUL

Prevents and calms sensitive skin reactions

Symptoms of sensitive skin

Factors such as climate changes or pollution generate an increasingly aggressive environment, along with hormonal or psychological disorders such as stress, besides chemical factors such as the degree of purity of the water, make more common to find atopic, sensitive or intolerant skins. These react in front of stimulus that do not produce the same effects in the rest of skins and that can cause hypersensitivity, redness, itching, or desquamation.

Modifications

- Skin pH variation
- Abnormal formation of the skin hydrolipidic layer
- Water loss of the stratum corneum
- Change in quality of the chemical composition of sebum

Consequences

- Unprotected skin
- Fragile and sensitive skin
- Tendency to redness, irritation, peeling
- Possible dehydration

Main synergy

SENSITIVE CARE BALANCE

Exclusive synergy developed by ANUBIS BARCELONA designed to get a protective effect of the skin, releasing pro-inflammatories that neutralize free radicals and soothe the skin. Based on the action of three specific ingredients: **Guaiazulene + Bisabolol + Lactic Acid**.

These actives respect the balance of the skin by preventing and calming the skin hypersensitivity and increasing skin hydration in front of possible adverse reactions in all skin types.

1

Balances the hydrolipidic mantle of the skin.

2

Soothes and moisturises the affected areas.

3

Restores the damages caused in the stratum corneum.

Symptoms

Anubis solution

1	SENSITIVE AND REACTIVE SKIN Hypersensitisation in front of any change in the stratum corneum. Abrupt changes of temperature cause breakage of capillaries. Microflora of the unbalanced skin.	GUAIAZULENE BISABOLOL	IMMEDIATE CALM OF REACTIONS
2	DAMAGED AND UNPROTECTED SKIN Alteration of barrier function. Decrease of the protecting ability against external aggressions such as free radicals due to a deficit of integrity of the stratum corneum.	ALOE VERA LACTIC ACID UREA	REPAIRS AND PROTECTS
3	DEHYDRATION OF STRATUM CORNEUM Failure of the barrier function of the skin with consequent decrease of the threshold of tolerance in front of external agents. Assimilation and excess production of free radicals, potentially irritating elements due to their high content in cytokines, pro-inflammatory proteins.	COLLAGEN PEPTIDES UREA	REPAIRS THE BARRIER FUNCTION

Restores the skin natural balance, enhancing the immune system activity and protecting against external aggression and pro-inflammatory elements. Reinforcement of the capillaries walls.

Involved in the formation and maintenance of epithelial cells. Protection and regulation of skin. Regenerates tissue, favoring the formation of collagen thus providing more structure to the fibers. Consequently, it will provide more elasticity to the tissue.

Powerful restorative action of the hydrolipidic mantle and redensification of stratum corneum when attracting and retaining water in the skin layer. Improves cells cohesion avoiding transepidermal water loss and acting as a protective shield from the external environment.

Protocol of the line

Cosmetic indications

- Atopic skin.
- Sensitive and reactive skins, or with need of immediate soothing of skin.
- Desquamations, redness or allergic reactions.
- Skins exposed to environmental aggressions.

Duration and regularity

- Time per session: 1 hour.
- Intensive treatment: 10 sessions, 2 per week.
- Maintenance treatment: 2 monthly sessions.

Use with equipment

- SENSITIVE ZUL CONCENTRATE can be combined with ionization. First using the + pole and then the - pole.

Precautions

- No precautions have been described associated with this type of treatment.

Protocol of the line ► Step by step

1 Cleaning and Toning

- Apply VITAL LINE MAKE UP REMOVER GEL FOR EYES AND LIPS using cotton pads or swabs making circular motions. Remove with water.
- Apply SENSITIVE ZUL CLEANSING MILK to face and neck. Work to remove traces of makeup and impurities. Remove with water.
- Apply SENSITIVE ZUL LOTION vaporising or with wet cottons.

2 Exfoliation

- Mix two measures of ENZYMATIC PEELING (5ml or 3,45gr) with EAU VERT (5ml) lotion until getting a fluid mixture which allows its application with brush on face, neck and neckline. Leave to take effect for a maximum of 10 minutes.
- Apply SENSITIVE ZUL LOTION vaporising or with wet cottons.

3 Concentrate and massage

- Apply ½ ampoule of SENSITIVE ZUL CONCENTRATE and workover the face by gentle tapping until its complete absorption.
- Apply SENSITIVE ZUL MOISTURIZER CREAM with a gentle massage until its complete absorption.

4 Mask

- MASK LINE CALM Apply to face, neck and neckline. Leave to take effect from 15 to 20 minutes. Remove with water.
- Apply SENSITIVE ZUL LOTION vaporising or with wet cottons.

5 Finalisation

- To treat the area around eyes and lips, the application of VITAL LINE EYES CONTOUR is recommended.
- Apply SENSITIVE ZUL MOISTURIZER CREAM to face, neck and neckline with a gentle massage until its complete absorption.

For more information about the products used in the protocol that are not part of the SENSITIVE ZUL line:

VITAL LINE MAKEUP REMOVER and VITAL LINE EYES CONTOUR: see line "VITAL LINE".

ENZYMATIC PEELING and EAU VERT LOTION: see line "COMPLEMENTS".

MASK LINE CALM: see line "MASK LINE".

SENSITIVE CARE BALANCE Solution

Technical sheet

Product **SENSITIVE ZUL**
Cleansing Milk

Description Soothing cleansing emulsion

Format	250 ml.	1000 ml.
Reference	10010250	10011000

SENSITIVE CARE BALANCE Solution

Main active ingredients

Guaiazulene With decongestant action and soothing properties, this ingredient is an excellent eliminator of toxins. Its effects are also anti-inflammatory and soothing. Has anti-ageing properties, prevents irritation and eczema.

Citric Acid Citric acid is a high skin tolerance AHA that when applied to the skin produces changes in the appearance of the stratum corneum by exerting a gentle exfoliation and increasing the epidermal and dermal glycosaminoglycans, which results in an increase thickness of the epidermis and a fixation of hydration.

Skin type	Results
Suitable for the most sensitive and delicate skins that require special care: alipic, reactive, with allergies, hypersensitive or with circulatory problems.	Cleansing and soothing emulsion. It decongests and offers a high power of protection against environmental aggressions. Removes impurities and removes makeup respecting the hydrolipidic film and fixing hydration.

How to use	Equipment	Frequency of use	Precautions
<ul style="list-style-type: none"> Apply to face, neck and neckline, lightly moistened, making a gentle circular massage. Remove with water. 	Not suitable for devices.	<ul style="list-style-type: none"> Professional use: Inside the cabin treatment, twice a week. Home use: Daily use, morning and/or at night. 	Have not been described.

SENSITIVE CARE BALANCE Solution

Main aactive ingredients

Bisabolol	Takes part in limiting the release of pro- inflammatory mediators, such as the cytokine IL - 1 and leukotriene B4. These two molecules are involved in reactions associated with skin hypersensitive, so it is an excellent active to soothe sensitive and reactive skins. With anti -free radical, protective, and restorative properties, interferes with the production of ROS (Reactive Oxygen Species) , which disrupt the chain of reactions leading to free radicals, protecting the skin from oxidation, irritation and aggression.
Aloe Vera Gel	Moisturising, nourishing and softening properties for its ability to retain water due to its richness in mucilage. Its mineral and vitamin content makes it especially useful in the fight against skin ageing. Repairs skin deeply. Glycoproteins and gamma-linolenic acid have a soothing effect, fundamental properties to alleviate the effects of skin irritation.
Hydrolyzed Collagen	Enhances the ability of tissues to retain water, causing that cells are properly hydrated and that the epidermis appears smooth and elastic. Provides essential amino acids that can recover its complex structure and fibrous network, helping to maintain and repair the strength and resilience of the skin. It has softening and firming properties through the activation of fibroblasts, and stimulates the formation of supporting fibers.
Urea	Organic component that increases the absorption of other active ingredients and hydrates the skin by attracting and retaining water. Stimulates exfoliation of dead skin cells.

Skin type	Results
Suitable for the most sensitive and delicate skins that require special care: alipic, reactive, with allergies, hypersensitive or with circulatory problems.	Calming tonic with a perfect adaptation to the skin pH . Calms and moisturises while preserving the ability to protect against free radicals, irritations and external aggressions.

How to use	Equipment	Frequency of use	Precautions
<ul style="list-style-type: none"> Apply on clean skin to face and neck. Apply the product vaporising slightly or using moistened cotton, with gentle tapping until completely absorbed. 	<ul style="list-style-type: none"> Suitable to use with ultrasonic peeling. Before use, we recommend to check with the supplier of the equipment. 	<ul style="list-style-type: none"> Professional use: In the cabin treatment, twice a week or whenever the professional requires it. Home use: Daily use, morning or/and at night. 	Have not been described.

Technical sheet

Product **SENSITIVE ZUL**
Moisturizer Cream

Description Soothing and moisturising cream

Format	50 ml.	200 ml.
Reference	10080050	10080200

SENSITIVE CARE BALANCE Solution

Main active ingredients

Bisabolol	Takes part in limiting the release of pro- inflammatory mediators, such as the cytokine IL - 1 and leukotriene B4. These two molecules are involved in reactions associated with skin hypersensitive, so it is an excellent active to soothe sensitive and reactive skins. With anti-free radical, protective, and restorative properties, interferes with the production of ROS (Reactive Oxygen Species) , which disrupt the chain of reactions leading to free radicals, protecting the skin from oxidation, irritation and aggression.
Lactic Acid	Lactic acid is an alpha hydroxy acid that is extracted from the fermentation of milk. The importance of this ingredient is its ability to exfoliate and moisturise the skin. When removing the layers of dead cells, the skin gets a healthier texture and a healthier appearance. Lactic acid exfoliates the skin without attacking or irritating it. Increases the hydration of the stratum corneum, improves the overall texture of the skin and helps to reduce wrinkles.
Guaiazulene	With decongestant action and soothing properties, this ingredient is an excellent eliminator of toxins. Its effects are also anti-inflammatory and soothing. Has anti-ageing properties, prevents irritation and eczema.
Citric Acid	Citric acid is a high skin tolerance AHA that when applied to the skin produces changes in the appearance of the stratum corneum by exerting a gentle exfoliation and increasing the epidermal and dermal glycosaminoglycans, which results in an increase thickness of the epidermis and a fixation of hydration.
Collagen Peptides	Enhances the ability of tissues to retain water, causing that cells are properly hydrated and that the epidermis appears smooth and elastic. Provides essential amino acids that can recover its complex structure and fibrous network, helping to maintain and repair the strength and resilience of the skin. It has softening and firming properties through the activation of fibroblasts, and stimulates the formation of supporting fibers.
